Professional Summary

MERN Stack Developer and Software Engineer with **1 year 9 months** of experience building scalable, high-performance full-stack web applications. Skilled in **MERN stack (MongoDB, Express.js, React.js, Node.js)**, **Redux**, **Vite**, **Firebase**, and **AI/ML APIs**. Produced **10+ React projects** and **MERN applications**, including AI-powered platforms and School Management Software with real-time features. Delivered **500+ GSAP interactive banners** for **Microsoft Copilot** and **Windows 11** across US and UK markets, boosting engagement. Experienced in building **RESTful APIs**, **JWT authentication**, and responsive HTML emails for **American Express** with a focus on UI/UX, performance, and responsive design. Efficiently leverage **AI platforms** like Claude to streamline development and reduce project delivery time.

Work Experience

NineStars Information Technologies Pvt. Ltd – Software Development - Engineer | (Mar 2025 – Present)

- Produced **500+ successful GSAP animated banners** for US and UK campaigns, including **Microsoft Copilot** and **Windows 11**.
- Worked on **MERN stack** projects using **MongoDB, Express.js, React.js**, and **Node.js**, building fast and scalable full-stack applications.
- Engineered **RESTful APIs** with **Express.js** and integrated **MongoDB** for efficient data management.
- Established responsive **HTML email templates** for **American Express**, ensuring cross-client compatibility.
- Leveraged AI tools like **Claude** and **OpenAI APIs** to boost development speed, simplify workflows, and improve productivity.

JK Global IT Solutions – Full Stack Web Developer

(July 2024 – March 2025)

- Built **10+ full-stack projects** including **MERN stack** applications (**MongoDB, Express.js, React.js, Node.js**) and **React.js** apps integrated with **Firebase** for real-time data functionality.
- Executed **JWT authentication**, **RESTful APIs**, and database management with **MongoDB** and **Mongoose ODM**.
- Improved application performance and ensured smooth user experience across all devices.

Education

Loyola Institute of Technology

Bachelor of Engineering (Electronics and Communication Engineering) | CGPA: **7.6/10**

(2019 – 2023)

Technical Skills

Frontend Development: HTML | CSS | JavaScript | React.js | Vite | Redux | Tailwind CSS | Responsive Web Design | Figma | GSAP Animation | Interactive UI | Animation Optimization

Backend Development: Node.js | Express.js | MongoDB | Firebase | RESTful APIs | JWT Authentication | Mongoose ODM | Middleware | Database Design | Server-side Logic | Performance Optimization

AI Integration: OpenAI API | ChatGPT | LLM Integration | AI-Powered Features | Prompt Engineering

Animation & Banner Development: Premium Campaign Banners | Interactive Animations

Email Development: HTML Email Templates | Responsive Email Design | ACID Testing | Cross-Client Compatibility

Tools & Technologies: Git | GitHub | Postman | MongoDB Compass | VS Code | AI-Powered Tools (GitHub Copilot, Claude, Antigravity)

Key Projects

AI-Powered Content Generation Platform (MERN Stack + OpenAI)

- Built a full-stack **AI platform** with **MERN** and **OpenAI GPT** for content generation, summarization, SEO, and multi-language support.
- Applied **JWT authentication**, role-based access, and **RESTful APIs** for 500+ users with caching and streamlined performance.
- Constructed a **real-time AI chat assistant** and analytics dashboard with faster database queries.

Microsoft

- Generated 500+ interactive banners using **GSAP** for enterprise campaigns in US and UK.
- Refined animations with fine-tuned **GSAP timelines** for smoother performance.
- Upgraded interactions and call-to-actions, boosting click-through rates by **45%**.

School Management Software

- Built a school management system with **React.js** and **Firebase** for 500+ daily users.
- Expanded modules for enrollment, attendance, grades, and parent communication.
- Streamlined queries, reducing load times by **35%**, with a responsive UI.

Automation Creative Platform

- Designed a scalable platform with **React.js** and **Vite** for rapid banner generation.
- Initiated reusable components and introduced **Redux** for state management.
- Architected modular structure for better scalability and faster development.

Enterprise Email Template Library

- Built responsive HTML templates for **American Express** and 100+ campaigns.
- Ensured cross-client compatibility across Outlook, Gmail, and Apple Mail.
- Introduced modular templates, reducing development time by **40%**.

Certifications

MERN Full Stack Development Course (Completed: March 22, 2024 | Certificate ID: LBWZ7MZT)
