PROFESSIONAL SUMMARY

Full Stack MERN Developer with **2+ years** of experience building scalable web applications using **MongoDB, Express.js, React.js, and Node.js**. Skilled in developing secure **RESTful APIs**, responsive user interfaces, authentication systems, database management, and cloud-based deployments. Experienced in delivering **end-to-end solutions**, including application architecture, hosting, deployment, domain configuration, and production releases. Proven track record of building **enterprise applications, school management systems, marketing platforms, and AI-integrated solutions** while optimizing performance, scalability, and user experience.

WORK EXPERIENCE

NineStars Information Technologies Pvt. Ltd. - Software Development Engineer *(March 2025 - Present)*

- Developed responsive web applications using **React.js** and **Vite**, integrating **RESTful APIs**, building **30+ reusable frontend components**, and applying full-stack practices through MERN Stack projects.
- Engineered **25+ responsive HTML email templates** for Sanofi (Life Sciences) campaigns, ensuring consistent rendering across major email clients (Outlook, Gmail, Apple Mail, Yahoo) and optimizing weekly turnaround times.
- Produced **200+ marketing assets** and **GSAP-based interactive animations** for Microsoft Copilot and Windows 11 campaigns targeting US and UK markets, driving a significant increase in user engagement.

JK Global IT Solution - Full Stack Developer *(July 2024 – March 2025)*

- Developed and deployed **10+ static and dynamic web applications** using **React.js, Firebase, Node.js**, and modern frontend technologies.
- Engineered a comprehensive **School Management System** using **React + Vite, Node.js, and Firebase**, currently running in **200+ schools**, streamlining administration, student management, reporting, and real-time database operations.
- Built responsive user interfaces, integrated secure database structures, and developed scalable application workflows.
- Managed **end-to-end project delivery**, including hosting, deployment, domain configuration, **DNS management**, production releases, and application maintenance.
- Collaborated directly with clients to gather requirements, implement custom features, and ensure successful project launches.
- Optimized application performance, responsiveness, and user experience across desktop and mobile platforms.

EDUCATION

Loyola Institute of Technology - Bachelor of Engineering in Electronics and Communication | CGPA: *(2019 - 2023)*
7.6/10

TECHNICAL SKILLS

Full-Stack & Frontend: React.js | Node.js | Express.js | MongoDB | Firebase | JavaScript (ES6+) | HTML5 | CSS3 | Redux | React Hooks | Vite | Tailwind CSS | Bootstrap 5

UI/UX & Animation: GSAP Animation | Interactive UI | Animation Optimization | Figma | Responsive Design

Deployment, APIs & Tools: RESTful APIs | JWT Authentication | Vercel | Netlify | Render | Domain Configuration & DNS Management | Production Releases | Git | GitHub | Postman | Axios | Gemini API | GitHub Copilot | Claude | ChatGPT

KEY PROJECTS

Gym Tracker (MERN Stack) | [Live Link](#) | [GitHub](#) | [Landing Page](#)

- Built a full-stack Gym Tracker application using the **MERN stack** with **RESTful APIs**, implementing backend services for authentication, workout tracking, diet logs, and cardio management using MongoDB and JWT.
- Integrated React.js frontend with backend APIs for real-time data flow and deployed on **Render**, featuring AI-based food search and calorie tracking using **Gemini API**, along with a React.js landing page for UI showcase.

Automation Creative Platform (React.js - Frontend)

- Developed reusable **React.js components** for a banner automation platform used for dynamic marketing asset creation.

- Implemented **Redux** for state management and handled custom HTML5 animation timelines for template-based workflows.

School Management Dashboard / System (React + Vite, Node.js & Firebase Database | JK Global IT Solution)

- Built a comprehensive dashboard interface using **React + Vite, Node.js, and Firebase**, handling student enrollment workflows, reporting, and data visualization, currently running in **200+ schools**.
- Implemented Firebase and Node.js for real-time data management, delivering faster state updates and improving application responsiveness.

Microsoft Copilot Campaign Assets

- Programmed HTML5 assets using complex **GSAP timelines** for major product launches.
- Delivered ad banners and campaigns for Microsoft Copilot and Windows 11 targeting US and UK markets.
